

MICHAEL KARIUKI WACHIRA

Fullstack Developer

+254 746 163 071 • kariukimichaelw@gmail.com • Grevillia Grove, Nairobi, Kenya • github.com/Mike-soft-cyber

SUMMARY

Fullstack developer freelancing since July 2025, designing and shipping full-stack web applications end-to-end — from database schema and REST API architecture through to deployed, client-facing UI. Background in data analysis and database management, having processed and validated datasets on independent records and healthcare research projects before moving into development. Comfortable owning a project from a client's written requirements to a live, working product.

PROFESSIONAL EXPERIENCE

Freelance Fullstack Developer | Self-Employed — Remote

July 2025 – Present

- Designed, built, and deployed full-stack web applications for independent clients using MongoDB, Express, React, and Node.js, owning each project from requirements through to production deployment.
- Currently developing KCGGRA, a community management platform for a Nairobi neighborhood association, integrating security incident reporting, M-Pesa subscription payments, and civic engagement into one system accessible via web app, SMS, and USSD — designed to reach both smartphone and feature-phone residents.
- Engineered a panic-button alert flow and QR-code visitor pass system for KCGGRA, replacing manual gate-call verification with an instant, trackable digital process.
- Completed Phase 1 of Dhahabu Themanini, a centralized database system for a multi-year youth mentorship program, replacing fragmented manual records with a single system tracking every enrolled family and mentee across cohorts and program stages; currently developing Phase 2.
- Translated non-technical client requirements into structured problem/solution specifications and REST API contracts, then delivered production builds independently without a supporting engineering team.

Data Entry Assistant (Freelance) | Independent Project — Late Dr. Ken Nyagudi, Former MCA Kisumu West

September 2024 – October 2024

- Assisted with a records project led by the Late Dr. Ken Nyagudi, entering and organizing official records using SQL and a XAMPP server.
- Maintained the accuracy and confidentiality of sensitive records throughout the 2-month engagement, with zero reported data integrity issues.
- Delivered all data updates within tight deadlines while working independently.

Data Analyst (Attachment) | SAFRA DATA — Nairobi, Kenya

April 2024 – August 2024

- Collected healthcare and telecommunications data directly from the local community using standardized field questionnaires.
- Collaborated within a 10-person team to clean, transform, and analyze healthcare datasets, directly supporting the accuracy of downstream data-driven decisions.
- Applied data analysis techniques — cleaning, transformation, and visualization — to convert raw survey responses into structured, actionable insight.
- Handled confidential health and personal data in accordance with data protection practice across a 5-month engagement.

TECHNICAL SKILLS

- **Frontend:** React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, ShadCN UI
- **Backend:** Node.js, Express.js, REST API design, Python
- **Databases:** MongoDB, Mongoose, MySQL, SQL, XAMPP
- **Tools & Deployment:** Git, GitHub, Vercel, Render
- **Data Analysis:** Data cleaning, transformation, and visualization
- **Networking:** Cisco CCNA — network fundamentals, switching, routing, and wireless essentials

EDUCATION

Zetech University

Bachelor of Information Technology — September 2021 to November 2024 — 3.1 GPA

Utumishi Boys Academy

High School Certificate — 2017 to 2020

CERTIFICATIONS

- CCNAv7: Introduction to Networks — Cisco Networking Academy
- CCNAv7: Switching, Routing, and Wireless Essentials — Cisco Networking Academy
- MERN Full-Stack Development — Power Learn Project (PLP) Academy
- MS Office Package — Griffins College
